Chuck E. Cheese's Winter 2015 Show

ENTERTAINMENT NEWSLETTER FOR THE CHUCK E. CHEESE SHOW
PLEASE SHARE WITH ALL CHUCK E. CHEESE'S CAST MEMBERS.

PLAY THIS SHOW DECEMBER 29 THROUGH FEBRUARY 22, 2015.

Great Scott! This is heavy! We've made it to the year 2015! While we may not have hoverboards quite yet, we do have a brand new Chuck E. Cheese Show! We worked hard to pack it full of fun for you and your guests. We hope you enjoy!

Check this out! Included with your new show is a brand new Live Show, *Do The Chuck E. 2015*! And the brand new, super-awesome *Chuck E. Birthday 2015 Show*! You should have received training materials in the weekly packet sent out on December 12. If you need replacement training materials, please contact Dalia Perez in the Marketing Department at (972) 258-3056.

Thanks again to all of you out there for doing your best to make Chuck E. Cheese's a magical place. We hope you enjoy the new show. Here's to a great 2015 and beyond!

Audio Standards

The enclosed show will have a volume level difference of 10 dBs between the Live/Birthday show and the regular show. Below are instructions to your Technical Managers on how to properly set and calibrate the amps for this new setting. Once the amps have been set, it is imperative that amps are not adjusted afterwards.

Step 1: Make sure you have the proper sound meter and it's set to weight c and reaction slow. This must be done in the morning when there is no ambient noise.

Step 2: For Studio C, have the control panel set at 100%. For all other shows, have the volume adjustment set to its highest level.

Step 3: With the show on the Live/Birthday Shows, adjust your amp until your sound meter reads about 90 dBs.

Step 4: Confirm your regular show is about 80 dBs in the show room and game room.

Step 5: Once you have confirmed the settings, remove amp knobs if possible. If you cannot remove knobs then find a way to make it difficult to randomly adjust the knobs. If none of the above can be done, then mark where the proper volume level is on your amp.

Step 6: Unplug the sense microphone from the back of the Symetrix.

Step 7: On the next directional, go over the volume settings with the managers.

With the new settings, the loudest the show will go is about 90 dBs. If you have any questions, please get in contact with your DT or RT.

Chuck E. Cheese's Winter 2015 Show
